

The original 600W was a very thick heavy oil. Today's oil is thinner because we are using better seals. The newer oils are improved with additives for anti-foam and rust inhibitors. The following chart lists the amount of oil used in the areas of the Model A.

Steering Box	7 <sup>3</sup> / <sub>4</sub> oz.
Transmission	1 pint
Rear Axle	1 <sup>1</sup> / <sub>2</sub> pint
